**THE UNIVERSITY OF CHICAGO**

even further and now to it that guests met each other—all of this, incidentally, done in a smooth, seemingly effortless manner.

**Early, Arrives**  
Chief of Fireboat John Simpson was one of the first arrivals as he had to make a 500-mile train of equipment for his own outfit. (His refusal to get aboard one it was.)

Following closely behind were Mr. and Mrs. Joshua Evans, Mrs. Charles Wilson, Admiral and Mrs. Thomas Kinkaid, the Minister of Luxembourg and Mme. Le Gallais.

Mrs. George Humphrey and  
Mrs. Arthur Sumnerfield

The largest picture hat seen belonged to Mrs. Morris Caritz. It was pink straw and the identical shade of her pink

organdie dress. She said her husband Morris had disapproved of her ensemble for such a cold

**Uncontaminated Intellects**

FOIAb3b

Dean McGeorge Bundy of Harvard University told a Senate subcommittee that the university has a policy of avoiding secret government research contracts because the performance of such contracts too easily contaminates an atmosphere of intellectual freedom.

The subcommittee is considering a bill to reorganize the Senate committee on government operations, which may probably make more sense within Dean Bundy's frame of reference when we point-out this was the committee of which Senator McCarthy was chairman.

We find it hard to believe that the faithful performance by loyal and dedicated scientists of a secret government research contract contaminates the atmosphere of intellectual freedom. It may impose a frustrating kind of silence upon some individuals of an extroverted and gabby nature, or such a contract may require performance beyond the skills of the scientists employed, but certain intellectual freedom cannot be abridged by a condition of high performance standards.

Dean Bundy was probably striking what he believed to be a blow in behalf of extremely gifted scientists whose naivete made them suckers for communist espionage operatives. But the requirement of secrecy cannot abridge freedom of uncontaminated intellects.
